skin measuring sensor

Safety during the tanning session. The patented medical skin measuring sensor determines the skin type. And 90 Ruby-Collagen-Boosters ensure a radiant complexion.

COLLARIUM®
mon amie

deluxe
i

Sun, collagen or both?
Thanks to preSelection the
customer can choose the
program. A well-dosed tanning
session in combination with
the Ruby-Collagen-Boosters
ensures a skin as soft as silk.

COLLARIUM®
mon amie

individuell

A pure collagen light therapy
which can be combined
with UV light in 3 different
tanning intensities.

COLLARIUM®
mon amie

Tower

Use your time to the fullest
with the collagen light therapy
and the optional vibraNano
vibration plate.

The combination of fitness
and a tanning session at
the same time ensures an
optimum result.

Anti-Aging

Over the years, our skin loses elasticity and often tends to produce scaly, dry spots or other types of blemishes which make the complexion look pale and minor wrinkles appear more distinct. Thanks to the unique combination of the soothing power of light and the specially designed collagen plus tubes, the Collarium® mon amie gives the sensitive skin back what it has lost over the years, i.e. elasticity, moisture and brilliant attractiveness. Collagen and optionally UV-light – simply twice as good, also for sensitive skin.

Vitamin D for a healthier life

Why not benefit from the “healing power of the sun” in the form of UVB light on the mon amie Collariums® as well? During the alternative UV tanning session the body produces the sun vitamin D3 essential for life.

A sufficient level of vitamin D has a supporting effect on the entire immune system and thus helps to prevent a lot of diseases. For example, it lowers the risk of breast and prostate cancer, the risk of heart attacks, strokes and vascular diseases and it helps to overcome insomnia and inner unrest.

Vitamin D regulates the calcium level and strengthens the bones. In addition, this hormone has a positive influence on the muscular performance and the entire physical fitness, which is not only proven with athletes.
