Three devices in a single solution **ANTI-PANIC**
COLLAGEN LED & COLLAGEN LAMPS
 Perfect for body, shoulders, nape and head for bald people

VERY SILENT

ENERGY SAVINGS OVER 75%

From 4,2 KW 230V or 380V

ANTI-PANIC

AIR HOT EJECTION SYSTEMS

Standard Equipment

- **Type of Session:** complete Body – only Face – only Legs
- **Defeatable zone:** face zone / shoulder and head
- **Delayed start of the session** (programmable)
- **SOFT TOUCH** keyboard system
- **Sessions times personalized**
- **CUSTOM Display** with the name of your beauty center
- **VOICE guide** (3 message Multilanguage)
- **RADIO** digital incorporated at the control panel
- **BLUETOOTH**
- **USB AUX function** for MP3 audio sources
- **Volume control** (MAX e MIN adjustable)
- **MUTE** Function
- **SPRAY** (manual or automatic)
- **Body Plexiglass anatomic shape**
- **IONIZED air ventilation + air disinfection with germicidal lam**
- **Cell Phone holder on the armrest**
- **COLLAGEN LED (face and/or Body)**
- **COLLAGEN LAMPS BODY**
- **COLLAGEN LAMPS SHOULDER**
- **COLLAGEN LAMPS NAPE**
- **COLLAGEN LAMPS HEAD**
- **CHROMOTHERAPY LED LIGHT** Emotion with remote Control
- **ADJUSTABLE BODY VENTILATION** (summer / winter)
- **2 settings menu (Operator and Service)**
- **Timer Ceck** for lamps hours control
- **Maintenance timer**
- **Electronic count Hours**
- **Electronic count Hours for Maintenance timer**
- **Remote control by pc by gesticenter**
- **Prepared for Eurosun Remote Console** (cable connection)
- **Prepared for external control** (impulse or n.a. contact)

EVA NATURAL RED - COLLAGEN

EVA RED light therapy seems to be gaining an enormous amount of popularity in recent years, and for very good reasons.

This breakthrough treatment, first discovered by NASA, has so many benefits and uses, and so little (if any) risks and side effects.

The red light is energizing and repairing damaged cells, stimulating collagen and elastin and giving the skin back its youthful look.

It is a real skin therapy treatment which, like all, takes time. In order to be able to notice rejuvenation in your skin and a decreasing in your wrinkles you have to really want to improve your skin and give it some time and attention.

The number of sessions it will take to notice improvements really does vary from person to person, depending of your skin type, age, lifestyle... but every person will see results.

We recommend you use the EVA RED Collagen for 3 consecutive weeks for 20 minutes a day to get the best results in the quickest time.

He tables below are extracted from the manufacturer's manual which is systematically supplied with your EVA RED COLLAGEN.

Age	Number of treatments	Results
25-35	2 to 3 sessions per week (20 minutes)	3 to 6 week
35-45	3 to 4 sessions per week (20 minutes)	4 to 6 week
+ 45	4 sessions per week (20 minutes)	6 to 8 week

> After 8 weeks of treatment : 2 sessions per week is enough to keep the results. (without the use of cosmetic products)

If you use EVA BIOSTIMULATION COLLAGEN, OXY, HYALURONIC, LIFT products, the results can be seen immediately

What is collagen?

Collagen is the magic skin component that helps maintain elasticity and firmness of the skin. After the age of 25 collagen production in the skin gradually decreases, leaving us with wrinkles and lines around the face and neckline.

EVA RED Collagen enables the user to make their skin look more beautiful and younger without using expensive injections.

The special red light of the collagen lamps stimulates the production of collagen in your skin, rejuvenating skin and smoothing even deep wrinkles.

The EVA RED collagen:

– Stimulates natural collagen production without injections or surgery

– 88% improvement in deep wrinkles (see studies *)

– Targets 97% success rate (*)

– Rejuvenat skin in as little as 3 weeks without cosmetics

– Collagen plumping in the comfort of EVA RED

This innovative Collagen system has a clinically proven 97% success rate in eliminating fine lines, significantly reducing deep wrinkles and giving skin a new lease of life.

Independent research demonstrates that certain cells in the skin can be encouraged to produce collagen, elastin and certain enzymes that are imperative to the skin's supportive structure. It happens through a process that produce light waves of 633 nanometers.

The lamp emits a UV-free red light which penetrates the skin to a depth of up 10mm, which is why it's so brilliant for treating problems close to the surface of the skin. Light encourages collagen production, which improves skin elasticity so after a few weeks of treatment you will begin to see plumper, firmer skin and reduced wrinkles.

The red light therapy can help with: tired aging skin, softening of lines, folds and wrinkles. Increased moisture and radiance.

Improved skin circulation. Accelerated skin repair. Improved elasticity and texture. Hyperpigmentation.

Research about Red Light Therapy

(*) Red light therapy for rejuvenation and Anti Wrinkle by Dr Ernst Smolka July 2009. Based on: The Photobiology of LED Phototherapy by Dr R.Glen Calderhead, MSc, Dr Med Sci FRSM President of SG Biomedical, Japan and Research coordinator at the Japan Phototherapy Laboratory in Tokyo.

By R. Glen Calderhead, MSc, DrMedSci, FRSM, President of SG Biomedical, Japan and Research Coordinator at the Japan, Phototherapy Laboratory in Tokyo :

"The inflammatory response from 633 nm is a controlled short-lived phase, which transcends through to the proliferation phase, together with the creation of neovascularization and the increase of local blood and lymphatic vessel flow. Lymphatic drainage is important in transporting leukocytes and lymphocytes into the target area and maintaining homeostasis of the treated skin. An increased blood supply raises the oxygen tension in the target area, creating cellular gradients and ensuring that the connection between the papillary dermis and the basement membrane of the dermal-epidermal junction (DEJ) and the basement membrane is supported." Source (2007) : US National Library of Medicine National Institutes of Health

<< Red light easily penetrates the dermis and can help with a variety of skin conditions, such as acne, rosacea, scarring and eczema, as well as improving skin quality >> says JoMartin, clinical director of Mapperley Park Clinic (Nottingham, UK) and an expert in light therapy and laser treatments.

Benefits:

- Minimizes the appearance of fine lines and wrinkles. Reduces the appearance of crow's feet.
- Clears blemishes, Improves the appearance of skin tone. Lessens skin coarseness.
- Regeneration/stimulation of collagen. Restores skin's natural collagen activity.
- Activates fibroblast cells which create collagen and elastin. Helps the appearance of sun-damaged skin.
- Creates more skin moisture which will help fill out skin. Helps the appearance of irregular pigmentation.
- Improves the effectiveness of cosmetic products.
- Reduces the negative impact of bad environment conditions.

EVA NATURAL RED - CHROMOTHERAPY

Our body absorbs colors in different ways. EVA RED LIGHT uses the principle of irradiation, using color-changing LEDs with remote control, capable of radiating color on the body.

The benefits of chromotherapy

Chromotherapy is an ally of our well-being.

Thanks to chromotherapy, the body's natural self-healing process is stimulated, which induces a reaction in order to restore well-being and balance.

According to their effect on humans, colors can be divided into warm colors (red, orange, yellow) and cold colors (blue, indigo, violet). Green is placed at the center of the spectrum of light because it is the balance point between the various colors.

"Color is a cosmetic and a medicine."

Aristotle

Effects of colors

In chromotherapy, each color is associated with particular psychic and spiritual characteristics of individuals, and has particular effects on the functioning of the organism.

The vibration given by each color and that is generated in an organism makes it possible to rebalance one's physical and mental state. Each color is then associated with specific properties, often based on simple psychological analogies.

Red

it is the color of love, heat, energy and light. It is associated with strength, health and vitality, it represents fire, joy, celebration, sexual arousal, blood and passions.

Orange

it would have a liberating action on physical and mental functions, an effect of integration and distribution of energy, induces serenity, enthusiasm, joy, will to live, optimism, positivity of feelings, physical and mental synergy.

Yellow

it is generally associated with the intellectual side, it stimulates and helps in the study. It is a protective and concrete color, helping those who are too open or too creative, associated with happiness, wisdom and imagination, it generates a good mood.

Green

fundamental color of nature, it is the color of harmony, it symbolizes hope, balance, peace, renewal and fertility. It is a neutral, relaxing color, it promotes reflection, calm, concentration.

Blue

it is a soothing and refreshing color it is a color that calms and soothes and that makes you forget about everyday problems. Valid ally in case of stress, insomnia, nervousness, inflammation, sore throat, laryngitis, hoarseness.

Indigo

it is the color of the balance between the left and right hemisphere of the brain. It has a strong purifying, meditative and deep reflection power.

Violet

it is a symbol of intelligence, knowledge, holiness and religious devotion. It represents the door that leads to the afterlife. Regulates blood pressure, stimulates the activity of the spleen and the formation of white blood cells.

Pink

the color of feminine, delicate and sensual beauty. It reduces tension, gently revitalizes and invigorates. Indicated to improve the appearance of the skin.

White

symbolizes purity, cleanliness, truth and innocence. White light contains all the septa colors of the iris. Vitalizing, it regenerates the body and clears the mind.

Turquoise

composed of blue and green. Connected to creativity, to the innovative spirit. It has a purifying action like green and a calming action like blue. Stimulates the immune system, helps skin regeneration and healing. Calm the headache.

It cannot replace traditional treatments but only support them or act in prevention.

This little guide is an introduction to the conscious use of color to improve life and achieve a state of balance.
