Beauty Light and gently tanning UV Light.
The result is smooth and soft skin
with a naturally tanned look.
A truly eye-catching combination.

naturally brown.
soft and smooth skin.

naturally brown. soft and smooth skin.

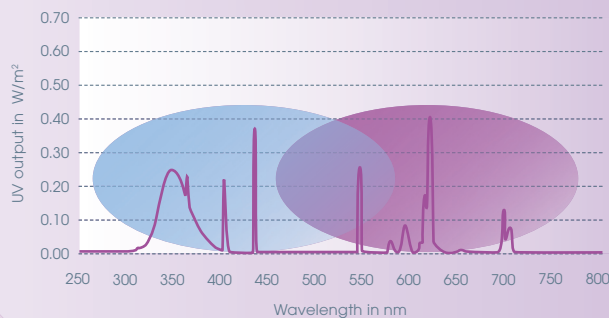

Treat your customers to the **new** smartsun tan

smartsun is a unique combination of Beauty Light and gently tanning UV Light. A brand new sunbed experience.

Relaxing red light caresses the body and guarantees a unique effect on the skin – smooth and super soft, whilst the gentle UV light ensures a fantastic, natural tan. You can feel and see the results! Try it for yourself!

smartsun is an innovative technology developed in partnership with leading scientists and technicians. smartsun combines the positive qualities of red light and UV light.

smartsun spectral curve

- Healthy look

smartsun penetration

smartsun – The new type of tan

smartsun not only opens up a new set of potential customers for your salon, it also attracts customers whomay be sceptical about visiting a tanning salon. Customers looking for treatments to make them look and feel good – as well as getting a natural tan – will love smartsun!

Of course, our entire range of tubes complies with all current standards and requirements.

We recommend you encourage your customers to try smartsun over a number of sessions – there's no better way to explain the fantastic results – they need to experience it for themselves.

For more information, the JK-Light team will be happy to help you!
